

's Water Tracking Chart

Year: _____

's Energy Tracking Chart

Year: _____

Tips for Parents

1. Check our lasts year's utility bills and add lines to the charts to show how much you consumed each month last year (orange in example)
2. Add a second set of lines to show this year's goals. (green in example)
Remember that your energy use will always be higher in winter and summer than in fall and spring.
3. Empower your children with specific actions they can take to reduce water and energy consumption
4. Try a reward system for meeting the goals!!
